SMART SCHOOL MANAGEMENT SOFTWARE

The only educational ERP you need for totally automating your entire campus.

www.eskoool.com

FEATURES:

Complete Student Management:

Flexible functionality and deployment of resources. Creates a common gateway of data and services for each student including information for admissions, ID Card, Sibling data, Student Promotion, PTM Records, while also facilitating Bulk Import/Export of Student Data.

Admission/Enquiry Management:

Effectively links online/offline admission enquiry and generates admission link, assigns class/section to students and generates merit list. It effectually shares information to convert enquiry into admission.

Fees Management:

Facilitates billing to create & manage fee heads, fee groups, fee group allocation, manage concession, fee collection full or partial, generate defaulter with alerts, complete reporting.

Attendance Management:

Manage daily/subject-wise student attendance, sending auto alerts to parents of absent students. Maintain attendance record with reporting which is easy and time saving.

SMS & Alerts :

Dedicated support system that sends alerts for students, class/school wise. Features include prompt notifications for: homework, Information circular, mobile app notification.

User Management:

One-of-its kind feature that creates individual user databases for other departments within school with access codes to ensure security of data. This includes accountants, librarians, help-desk and administrators alongside teachers and students with role-based access permission.

Transport Management:

Engages transport facilities provided by school or by private contractors by collecting data of: Transport vehicle, bus driver, conductor/bus in-charge. Mapping of bus routes, pickup points, bus allocation to student/staff, Quick and easy printing of bus pass, fees collection, generating route wise alerts

Examination Management:

Analyses and manages exam data by creating Teacher Grade Books for entering and recording marks and grade calculation for administration archives. Customized content for students by creation of exam groups, exam time-table, mark sheet generation, alerts and final reports.

Automatic Time Table Management:

Generates class time table of student & staff. Logarithm creates automatically assigned, period wise subject time tables for teachers. Advanced features enable teachers to time table, make class adjustment online and coordinate with fellow staff members with engaging in actual dialogue.

Library Management:

Help tool for librarians to maintain concise database of books and journals in one place by recording all publishers, book categories & locations in library. Smooth track record of issue/return and fine calculation, individual student/teacher issue/return/renewals with personalized report generation, as well as update databases for addition of new books.

Front Desk Management:

Enhanced security measures by recording visitors coming in school with photograph/ID, generating gate pass, keeping record of student /staff on short leave. Automatically generates gate pass for each student with guardian's photo record and matches in database at later drop/pick-up times.

Online Examination:

Supports online examinations requiring system stability to support multiple logins on the server. Facilitates registration of online courses, creates exam category, automatic creation of question bank, creates exams with minimum teacher inputs and maximum sustenance. Mobile access to students to take online exam directly through student login panel with timely and no-hassle generation and reporting of results.

Inventory Management:

Auditing support by maintaining store inventory of school. Access to store keeper to keep track of inventory items with issue register, stock alerts, stock value etc.
